COLORADO STATE UNIVERSITY DRONE AVIATION SUMMER PROGRAM FOR DENVER REGION HIGH SCHOOL STUDENTS AND INSTRUCTORS

Learn to fly drones and become certified as an FAA Part 107 / Remote Pilot!

Colorado State University and the CSU Drone Center, in collaboration with CSU Spur and the Colorado Air & Space Port, is proud to announce the 2024 Drone Aviation Pathways Summer Program for Denver-region high school students and instructors! Spend 5 days at the CSU Spur campus just outside of Downtown Denver, and attend the immersive CSU Drone Flight School, where you'll learn to fly many types of uncrewed aircraft and gain the knowledge and experience necessary to pass the FAA Part 107 exam and be certified as a Remote Pilot!

Curriculum includes classroom instruction, actual hands-on flight time, engaging lectures and breakout sessions, and real-world mission-planning scenarios with our UAV aircraft!

High school teachers / instructors will receive curriculum development materials to facilitate future educational programming upon return to their home institutions. This program is presented at **virtually zero cost** to participating institutions and students, and includes tuition, lunch, classroom materials, and all associated testing costs.

This program will run three separate sessions, June 24-28, July 8-12, and July 29-August 2 of 2024. Class size is very limited, some restrictions exist. Detailed program information and the application portal can be found at the link below or contact Adam Smith at adam.s.smith@colostate.edu with any questions.
